Level Descriptors

Key characteristics of a Level 2 Role

Definition of the Level 2 Role

People at level 2 require basic factual knowledge of a field of work. They may carry out clinical, technical, scientific or administrative duties according to established protocols or procedures, or systems of work

Example of Role at Level 2

Support Worker:

Support workers work to agreed protocols and procedures. They are able to solve routine problems and make straightforward judgements. They have general skills across a range of aspects of service delivery and work under close supervision.

These characteristics have been developed by Skills for Health working with employers and other stakeholders.

Basic Information:

| | |
|------------------------|---|
| Named Role | Nail Carer |
| Area of work | Community NHS Or Local Authority Or Independent |
| Role Family | Wider Healthcare Team |
| Experience required | Completion of accredited nail carer course |
| Career Framework Level | 2 |

Summary of Role

Nail care is not a podiatry service; it provides routine care for normal toe nails and feet as well as finger nails and hands.

The nail carer will also be taught to give low level falls prevention advice and encouraged to signpost to appropriate health promotion type services.

Scope of the Role

Required for this role:

- CRB practitioner compliance
- Continuous professional development
- Local NHS podiatry referral procedure
- Public liability insurance

The service is for the provision of nail care. It is intended to help those people who cannot manage the task for themselves. Nail care is not a podiatry service; it provides routine care for normal toe nails and feet as well as finger nails and hands. This will include nail cutting, gentle hand and foot massage and nail painting. Foot and/or hand bathing may take place if required.

Nail carers will cut the toe nails of clients who have diabetes but are low risk, following receipt of a GP or podiatrist referral. They will also be able to manage the nails of those clients with fungal infections.

The nail carer will also be taught to give low level falls prevention advice and encouraged to signpost to appropriate health promotion type services.

Should there be any signs of infection or foot disorder foot care will not be given and the client will be advised to seek professional help.

There will be a help line for the nail carer to obtain advice directly from a qualified podiatrist. The nail carer will work in various locations to include community venues and clients own home.

All level 2 roles will have the following common/core competences.

All competences are national occupational standards (NOS).

Specific competences to the role have then been identified. Any additional competences specific to the locality should then be identified locally using the competence tools and the health functional map added to the template using the same format.

Indicative Learning and Development

Transferable roles may be underpinned by a range of learning and development activities to ensure both competence and role confidence. The learning and development included within the template is by nature indicative. In some cases it is endorsed by professional bodies and/or special interest groups and accredited by an awarding body.

| Transferable role | Nail Carer |
|---------------------------------|---|
| Formal endorsed learning | <p>Certificate in Nail Care Therapy</p> <p>Learner assessments are recorded via assessment documentation within a portfolio of evidence, including consultation sheets and assignments. MQCs are issued and located following awarding body procedures. Centralised summative record sheets are completed by tutors and assessors in accordance with internal and external verification procedures.</p> |
| Informal learning | <p>Work shadowing, supervision by podiatrists and reflective evaluations following client interaction.</p> |
