At the Nuffield Orthopaedic Centre the advanced practitioner orthopaedic physiotherapy role may also be called the orthopaedic physiotherapist specialist in the hip/knee triage clinic

Level Descriptors

Key characteristics of a Level 7 Role

Definition of the Level 7 Role

People at level 7 of the career framework have a critical awareness of knowledge issues in the field and at the interface between different fields. They are innovative and have a responsibility for developing and changing practice and/or services in a complex and unpredictable environment.

Example of Role at Level 7

Advanced Practitioner:

Whilst recognising that some professions have already defined the advanced practitioner: the definition of an advanced practitioner used in this template is intended to be applicable to all professional and occupational groups. This definition is based on the level 7 descriptors that inform the career framework for health and therefore is useful to employers.

Advanced practitioners are experienced professionals who have developed their skills and theoretical knowledge to a very high standard, performing a highly complex role and continuously developing their practice within a defined field and/or having management responsibilities for a section/small department. They will have their own caseload or work area responsibilities.

Further information regarding the role of the advanced practitioner has been used to support these findings

Basic Information:

Named Role	Advanced Practitioner Orthopaedic Physiotherapy, Nuffield.
Area of work	Community NHS Or Local Authority Or Independent, Hospital NHS Or Independent
Role Family	AHPs
Experience required	Relevant professional qualification, considerable post registration work experience, considerable outpatient experience
Career Framework Level	7

Summary of Role

Developed in 2009 as part of the Department of Health (England) reducing waiting times initiative.

Scope of the Role

Working as part of the multidisciplinary team this role will assess, request diagnostic tests including radiography, plan and implement treatment, plan for and discharge patients with orthopaedic conditions.

All level 7 roles will have the following common/core competences.

All competences are national occupational standards (NOS)

Specific competences to the role have then been identified. Any additional competences specific to the locality should then be identified locally using the competence tools and health functional map and added to the template using the same format.

Level 7 Core Competences / National Occupational Standards:

Underpinning Principle	Reference Function		Competence
