Plans straightforward tasks and works guided by standard operating procedures and protocols

Works to agreed protocols

Exercises a degree of autonomy depending upon the complexity and risk of procedures being undertaken Prioritises own workload

May be responsible for planned, delegated activities including care Undertakes well defined tasks requiring limited judgement

Definition of the Level 4 Role

People at level 4 require factual and theoretical knowledge in broad contexts within a field of work. Work is guided by standard operating procedures, protocols or systems of work, but the worker makes judgments, plans activities, contributes to service development and demonstrates self- development. They may have responsibility for supervision of some staff.

Example of Role at Level 4

Assistant Practitioner:

Assistant practitioners have a required level of knowledge and skill enabling them to undertake tasks that may otherwise have been undertaken by a practitioner. They will have developed specific technical skills and have a high degree of technical proficiency. They will exercise a degree of autonomy and undertake well defined tasks requiring limited judgement. They may have line management responsibility for others.

An assistant practitioner is a worker who competently delivers health and/or social care to and for people. They have a required level of knowledge and skill beyond that of the traditional healthcare assistant or support worker. The assistant practitioner would be able to deliver elements of health and social care and undertake clinical work in domains that have previously only been within the remit of registered professionals. The assistant practitioner may transcend professional boundaries. They are accountable to themselves, their employer, and more importantly, the people they serve.

The characteristics of an assistant practitioner have been developed by Skills for Health working with focus groups of employers and other stakeholders.

Basic Information:

| Named Role | Spinal Surgery Co-Ordinator |
|------------------------|--|
| Area of work | Community NHS Or Local Authority Or Independent, Hospital NHS Or |
| | Independent |
| Role Family | Admin & Clerical, Cross Cutting (Any Inter Disciplinary) |
| Experience required | Considerable experience in a healthcare environment |
| Career Framework Level | 4 |

Summary of Role

Developed in 2009 as part of the Department of Health (England) reducing waiting times initiative.

Scope of the Role

Working as part of a multidisciplinary team this role will ensure compliance with waiting times targets and enable patients to progress effectively along defined clinical pathways.

All level 4 transferable roles have the following common/core competences. All competences are national occupational standards (NOS)

Specific competences have been identified for each role.

Any additional competences specific to the locality should then be identified locally using the Skills for Health competence tools and the health functional map and added to the template using the same format.

Level 4 Core Competences / National Occupational Standards:

| Underpinning Principle | Refer | ence Function | Competence |
|--|-------|---|--|
| 1. COMMUNICATION | 1.2 | Communicate effectively | GEN97 Communicate effectively in a healthcare environment http://tools.skillsforhealth.org.uk/competence/show/html/id/3001 |
